REPORT ON REVIEW OF FINANCIAL SAFETY RATIO REPORT

To: The Shareholders of
SSI Securities Corporation

We have reviewed the accompanying financial safety ratio report of SSI Securities Corporation ("the Company") as at 30 June 2022 as prepared on 12 August 2022 and set out on pages 6 to 35. The report has been prepared by the Company's Management in accordance with the regulations under Circular No. 91/2020/TT-BTC dated 13 November 2020 issued by the Ministry of Finance on financial safety ratio and remedies applicable to securities companies that fail to meet the stipulated financial safety ratio ("Circular No. 91") and *Note 2.1* to the financial safety ratio report.

Management's responsibility

The Company's Management is responsible for the preparation and presentation of the financial safety ratio report in accordance with the regulations under Circular No. 91 and *Note 2.1* to the financial safety ratio report, and for such internal control as the Company's Management determines is necessary to enable the preparation and presentation of the financial safety ratio report that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express a conclusion on the financial safety ratio report based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements No. 2410 – Review of Financial Information Performed by the Independent Auditor of the Entity.

A review of financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying financial safety ratio report is not prepared and presented in all material aspects, in accordance with the regulations under Circular No. 91 and *Note 2.1* to the financial safety ratio report.

A member firm of Ernst & Young Global Limited

Building a better working world

Basis of preparation and restriction on use of audit report

We draw attention to *Note 2.1* and *Note 3* to the financial safety ratio report, which describe the applicable regulations, interpretations and main policies to preparation of the financial safety ratio report. Also as described in *Note 2.2*, the financial safety ratio report is prepared to comply with the regulations on preparation and disclosure of the financial safety ratio report. As a result, this report may not be suitable for other purposes.

Associates

As at 30 June 2022, the Company has two (02) indirectly owned associates.

Employees

Total number of employees of the Company as at 30 June 2022 was 1,408 persons (as at 31 December 2021 was 1,270 persons).

2. BASIS OF PRESENTATION

2.1 The applicable regulations

The financial safety ratio report of the Company is prepared and presented in accordance with the regulations under Circular No. 91/2020/TT-BTC dated 13 November 2020 issued by the Ministry of Finance on financial safety ratio and remedies applicable to securities companies that fail to meet the stipulated financial safety ratio ("Circular 91"). This financial safety ratio report is prepared on the basis of the financial data of the Company at the reporting date.

2.2 Purpose of preparation

The financial safety ratio report is prepared to comply with the regulations on preparation and disclosure of the financial safety ratio report and may not be suitable for other purposes.

2.3 Reporting currency

The Company prepares this report in Vietnam dong ("VND").

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT

3.1 Liquid capital ratio

Liquid capital ratio of the Company is determined using the formula specified in accordance with Circular 91 as follows:

$$\text{Liquid Capital ratio} = \frac{\text{Liquid Capital x 100\%}}{\text{Total exposures to risks}}$$

In particular, total exposures to risks are the sum of exposures to market risk, settlement risk, and operational risk.

3.2 Liquid Capital

In accordance with Circular 91, the Company's liquid capital is the total equity that can be converted into cash within ninety (90) days, details as follows:

- Owners' equity, excluded redeemable preferred share (if any);
- Share premium, excluded redeemable preferred share (if any);
- Convertible bonds – Equity component (applicable to securities company that is convertible bonds issuer);
- Other owners' equity;
- Differences from revaluation of assets at fair value;
- Foreign exchange rate differences;
- Charter capital supplementary reserve;
- Operational risk and financial reserve;
- Other reserves in accordance with prevailing regulations;
- Undistributed retained earnings;
- Balance of provision for impairment of assets;
- Fifty percent (50%) of the increased in value of revaluated fixed assets in accordance with prevailing regulations (in case of increased revaluation), or minus the decreased in value (in case of decreased revaluation);
- Decreases to liquid capital *(Note 3.2.1);*
- Increases to liquid capital *(Note 3.2.2);* and
- Other capital (if any).

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.2 Liquid Capital (continued)

3.2.1 Decreases to liquid capital

The Company's liquid capital is decreased due to the following items:

- Treasury shares (if any);
- Total decreases in value of financial assets recognised at cost equivalent to the difference between market value and carrying value of the assets, excluding the securities issued by the Company's related parties as well as the securities restricted to transfer with the remaining restriction period of more than ninety (90) days as from the date of financial safety ratio report;
- The escrow value, in case the Company places collateral assets to the banks for banks' guarantee upon the Company's issuance of covered warrant, is determined as the minimal value of the followings: the value of banks' guarantee and the value of collateral assets (equivalent to volume of assets * asset price * (1 – Market risk coefficient));
- The value of the Company's assets used as collaterals for the Company's liabilities with other institutions and individuals, of which the remaining terms are of more than ninety (90) days, (equivalent to volume of assets * asset price * (1 – Market risk coefficient));
- Short-term assets include prepaid items, receivables and advances of which the remaining recovery period or settlement period is of more than ninety (90) days, and other short-term assets;
- Long-term assets;
- The qualified, adverse or disclaimed items on the audited and reviewed financial statements (if any);
- Securities issued by the Company's related parties in the following cases:
  - The parent company, subsidiaries of the Company;
  - Subsidiaries of the Company's parent company.
- Securities restricted to transfer with the remaining restricted period of more than 90 days as from the calculation date;
- Irrecoverable items from other counter parties which are assessed as completely insolvent, are determined at the contract value.

When determining the above decrease amount to liquid capital, the Company makes the following adjustment to the decrease value:

- For assets used as collaterals for obligations with other entities and individuals, the decrease value shall be deducted by the minimal value of the followings: market value of the assets, book value and residual value of the obligation;
- For assets secured by other entities and individuals' assets, the decrease value shall be deducted by the minimal value of the followings: value of the collaterals, book value.

Accordingly, value of the collateral used in calculating the deduction from the decreases to liquid capital is determined as: quantity of the asset * asset price * (1 – Market risk coefficient) in accordance with Circular 91.

The decreases to liquid capital of the items in current and non-current assets does not include the following items:

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.2 Liquid Capital (continued)

3.2.1 Decreases to liquid capital (continued)

- Assets exposed to market risk in accordance with Circular 91, except for securities issued by a subsidiary, parent company or subsidiary of the Company's parent company or securities restricted to transfer with the remaining restriction period of more than ninety (90) days as from the date of calculation;
- Contracts and transactions exposed to liquidity risk in accordance with Circular 91;
- Provisions for impairment of assets;
- Provision for bad debts.

The Company does not calculate exposures to risk for items deducted from the liquid capital.

3.2.2 Increases to liquid capital

The Company's liquid capital is increased due to the following items:

- Total increases in value of financial assets recognised at cost equivalent to the difference between market value and carrying value of the assets, excluding the securities issued by the Company's related parties as well as the securities restricted to transfer with the remaining restriction period of more than ninety (90) days as from the date of financial safety ratio report; and
- Debts that are convertible to equity, including: convertible bonds, preferred shares and other debt instruments registered to supplement liquid capital with the State Securities Commission and satisfied all conditions stated in Clause 2, Article 7 of Circular 91.

The maximum value of total debt items used to increase liquid capital is 50% of the Company's owners' equity. Regarding convertible debts and debts registered to supplement the Company's liquid capital with the State Securities Committee, the Company deducts 20% of their original value each year during the last five (05) years prior to maturity/conversion into common shares and deducts 25% of residual value quarterly during the last four (04) quarters prior to maturity/conversion into common shares.

3.3 Exposures to market risk

Exposures to market risk are the potential losses which may occur when the market value of the Company's assets fluctuates in a negative trend. Exposures to market risk for the Company's assets stated in Clause 2, Article 7 of Circular 91, include cash and cash equivalent, money market instruments, bonds, shares and funds/shares of securities investment companies; that are determined by the Company at the end of the transaction day using the following formula:

Exposures to market risk = Net position x Asset price x Market risk coefficient

In particular, net position is the net volume of securities held by the Company at the reporting date, after being deducted by the number of securities lent and increased by the number of securities borrowed in accordance with prevailing regulations.

Exposures to market risk of securities that are not yet fully distributed from underwriting contracts in terms of firm commitment, covered warrant issued by the Company and future contracts are determined using the formula demonstrated in *Note 3.3.2*.

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.3 *Exposures to market risk* (continued)

Assets which are excluded when determining exposures to market risk include:

- Treasury shares;
- Securities issued by related parties of the Company in the following cases:
  - The parent company, subsidiaries of the Company;
  - Subsidiaries of the Company's parent company.
- Securities restricted to transfer with the remaining restricted period of more than ninety (90) days as from the calculation date;
- Bonds, debt instruments and valuable papers in the money market which have been matured;
- Securities which have been hedged by sell warrants or futures contracts; sell warrants and sell options which have been used to hedge for underlying securities.

3.3.1 *Market risk coefficient*

Market risk coefficient is determined for each account of assets as specified in Appendix I of Circular 91.

3.3.2 *Asset price*

a. Cash and cash equivalents, monetary market instrument

Value of cash in VND is the cash balance at the calculation date. Value of cash in foreign currencies is the equivalent in VND using the exchange rate published by credit institutions which are allowed to conduct foreign currencies trading at the calculation date.

Value of cash equivalent and money market instruments is the amount deposited or acquisition cost plus accrued interest using the effective interest rate which has not been settled as at the calculation date.

b. Bonds

Value of listed bonds is the average price quoted on the trading system of Securities Stock Exchange on the latest trading day plus accrued interest. In case there is no transaction for such bonds during more than two (2) weeks prior to the date of calculation, the value of bonds is the highest of the following values included accrued interest: Acquisition cost; Face value and Price determined by the internal valuation methods.

Value of unlisted bonds is the highest of the following included accrued interest values: quoted price on the quotation system selected by the Company (if any); Acquisition cost; Face value; Price determined by the internal valuation methods.

c. Shares

Value of listed shares are determined based on the quoted closing prices on the Ho Chi Minh Stock Exchange and the Hanoi Stock Exchange of the latest trading day prior to the date of calculation.

Value of unlisted shares which have been registered on the unlisted public companies market (UPCoM) is the quoted closing prices of the latest trading day prior to the date of calculation.

In case there is no transaction of the shares listed or registered on UPCoM during more than two (2) weeks prior to the date of calculation, value of these shares is the highest of the following values: Book value; Acquisition cost and Price determined by internal valuation methods of the Company.

Value of shares which are suspended from trading, delisted or cancelled is the highest of the following values: Book value, Par value, Price determined by internal valuation methods of the Company.

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.3 Exposures to market risk (continued)

3.3.2 Asset price (continued)

d. Other Sercurities

The value of covered warrants issued by other securities trading organizations is the closing price at the latest trading day of the calculation date (if the covered warrants are listed); or the value of the covered warrant is the purchase price (if the covered warrant is unlisted).

Value of shares which are registered or custodied but has not been listed or registered for trading is the average price of quotations from at least three (03) securities companies which are not related to the Company on the latest trading day prior to the date of calculation. If there are no sufficient quotation from at least three (03) securities companies, the value of shares is the highest of the following values: Quoted price; Value determined in the latest reporting period; Book value; Acquisition cost; Price determined by internal valuation methods of the Company.

Value of shares of organizations in term of dissolution, or of bankruptcy is 80% of the liquidated value of such shares at the date of preparation of the latest balance sheet, or price determined by internal methods of the Company.

The value of other shares or capital contributions is the maximum of book value; acquisition cost/value of capital contribution; price determined by internal methods of the Company.

e. Funds/shares of securities investment companies/ETF fund

Value of public close-end fund/ ETF fund is the closing price of the latest trade date prior to the date of calculation. In case public close-end fund has no transactions in more than two (02) weeks prior to the date of calculation, the value is calculated by net asset value ("NAV") per fund certificate at the latest reporting period prior to the calculation date.

Value of member fund/open-end fund/shares of securities investment companies in private issues is the NAV per unit of contributed capital/fund certificate unit/shares at the latest reporting period prior to the date of calculation.

Value of other funds/shares is price determined by the internal methods of the Company.

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.3 Exposures to market risk (continued)

3.3.2 Asset price (continued)

f. Undistributed securities from underwriting contracts in form of firm commitment

- Exposures to market risk of these securities are determined as the following formula:

$$\text{Exposures to market risk} = \{\text{Quantity of undistributed securities, or distributed but not yet paid} \times \text{Issuance underwriting price} - \text{Value of collaterals (if any)}\} \times \text{Issuance risk coefficient} \times \left\{ \text{Market risk coefficient} + \frac{(\text{Issuance underwriting price} - \text{Trading price}) \text{ (if positive)}}{\text{Issuance underwriting price}} \right\}$$

In case of Initial Public Offering (IPO), including initial equitization auction, bonds auction, trading price is equal to book value per share of issuer at the latest period, or initial price (if unable to determine book value), or par value (in case of bonds).

- Market risk coefficient is determined in *Note 3.3.1*
- Issuance risk coefficient is determined based on remaining duration to the ending date of the distribution period according to the contract, but not exceed the allowed distribution period in accordance with legislative regulations, as follows:
  - Until the last day of the distribution period, if the remaining time is more than sixty (60) days: the issuance risk coefficient is 20%;
  - Until the last day of the distribution period, if the remaining time is from thirty (30) to sixty (60) days: the issuance risk coefficient is 40%;
  - Until the last day of the distribution period, if the remaining time is less than thirty (30) days: the issuance risk coefficient is 60%;
  - In the period from the last day of the distribution period to the settlement day: the issuance risk coefficient is 80%;
  - After the last settlement day, the Company has to determine the exposures to market risk of securities that have not been fully distributed using the formula in *Note 3.3* in accordance with regulations stated in Clause 4 Article 9 - Circular 91;
  - Value of customers' collaterals is determined as follows:

    Value of collaterals = Volume of assets x Asset price x (1 – Market risk coefficient).

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.3 Exposures to market risk (continued)

3.3.2 Asset price (continued)

g. Covered warrants issued by the Company

Exposures to market risk of covered warrants issued by the Company, in case of in-the-money, is determined by the following formula:

Value at risk = Max {((P_0 *x* Q_0*/k-* P_1 *x* Q_1*) x r -MD), 0}*

In which:

P_0*: Average closing price of underlying securities in 05 trading days preceding before the calculation date;*

Q_0*: the number of circulating* covered *warrants of a securities companies;*

k: conversation ratio;

P_1*: price of the underlying securities determined as prescribed in the Appendix II of Circular 91;*

Q_1*: the number of the underlying securities used by a securities companies as guarantee of the obligation settlement for the covered warrants issued by such companies;*

r: the market risk coefficient of the covered warrants determined as prescribed in Appendix I of Circular 91;

MD: the margin deposit when the securities companies issue the covered warrants.

- The underlying securities in the above formula shall satisfy the following conditions: being included in the issuance plan or registered with the State Securities Commission on the use of these securities to hedge against the risks of the covered warrants; and being the underlying securities of the covered warrants;
- In case the covered warrant issued by a securities company is unprofitable, the Company shall calculate exposures to market risk of underlying securities from the hedging activities instead of calculate exposures to market risk of the covered warrants;
- The Company also calculates the market risk of the positve difference between the value of the underlying securities used to hedge against the risk of the covered warrants and the value of the underlying securities necessary to hedge for the covered warrants (corresponding to hedging value).

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.3 Exposures to market risk (continued)

3.3.2 Asset price (continued)

h. Futures contract

Exposures to market risk of futures contracts are determined by the following formula:

Exposures to market risk = Max {((Settled price at the end of the day – Securities purchasing value) x Market risk coefficient of futures contract - Margin value), 0}

In which:

- Settled price at the end of the day = Closing price x Open volume
- Securities purchasing value is the value of underlying securities purchased by the Company to cover for future contractual obligations.
- Margin value is the value of assets that the Company deposits for investment, proprietary trading and market making transactions related to futures contracts.

3.3.3 Increase of exposures to market risk

Exposures to market risk of assets are increasingly adjusted in case that the Company over invests in these assets, except for the securities issued under underwriting contract in form of firm commitment, Government bonds and bonds guaranteed by the Government. The exposures to market risk will be adjusted in accordance with following principles:

- An increase of 10% if the total value of investment in shares and bonds of a securities issuer for more than 10% to 15% of the owners' equity of the Company;
- An increase of 20% if the total value of investment in shares and bonds of a securities issuer for more than 15% to 25% of the owners' equity of the Company;
- An increase of 30% if the total value of investment in shares and bonds of a securities issuer for more than 25% of the owners' equity of the Company.

Dividends, coupons, preference right of shares (if any) or interest of deposits, cash equivalents, negotiable instruments and valuable papers shall be added to the value of asset for the purpose of determining the exposures to market risk.

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.4 Exposures to settlement risk

Exposures to settlement risk are the potential losses which may occur when a counter party fails to fulfill its settlement obligation or transfer assets on time as committed. Exposures to settlement risk are determined at the transaction date as follows:

- For term deposits at credit institutions; certificates of deposit issued by credit institutions; securities borrowing or loans contracts in accordance with legal regulations; repurchase agreements and reversed repurchase agreements in accordance with prevailing regulations; margin loan contracts in accordance with prevailing regulations; receivables from customers in securities trading activities.
- Exposures to settlement risk before the date of securities transfer, cash settlement, contract liquidation shall be determined using the following formula:

  Exposures to settlement risk = Settlement risk coefficient of counter party x Value of assets exposed to settlement risk
- For underwriting contracts in the form of firm commitment signed with other organizations in a syndicated underwriting contract in which the Company is the lead underwriter, the exposures to settlement risk value equals 30% of the remaining value of unpaid underwriting contracts;
- For receivables from mature bonds, valuable papers, mature debt instruments for which payment has not been paid, over due other receivables and other overdue assets, securities which have not been received on time, including securities and cash which have not been received from term deposits at credit institutions; certificates of deposit issued by credit institutions; securities borrowing or loan contracts in accordance with prevailing regulations; repurchase and reverse repurchase agreements in accordance with prevailing regulations; matured margin loans in accordance with prevailing regulations, exposures to settlement risk is determined as follows:

  Exposures to settlement risk = Settlement risk coefficient by time x Value of assets exposed to settlement risk
- For other receivables and other contracts, transactions and other capital uses exposed to settlement risks; receivables from debt trading with partners other than Vietnam Asset Management Company (VAMC), Vietnam Debt & Asset Trading Corporation (DATC), exposures to settlement risk is determined as follows:

  Exposures to settlement risk = 100% x Value of all assets exposed to settlement risk
- For advances with the remaining repayment term of less than 90 days, exposures to settlement risk is determined as follows:

  (i) Accounting from 0% to 5% of the owners' equity at the reporting date: Exposures to settlement risk = ***8% x Value of all assets exposed to settlement risk***

  (ii) Accounting more than 5% of the owners' equity at the reporting date: Exposures to settlement risk = 100% x Value of all assets exposed to settlement risk

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.4 Exposures to settlement risk (continued)

3.4.1 Settlement risk coefficient

Settlement risk coefficient is determined based on the type of counterparties and the period as specified in Appendix III, Circular 91.

3.4.2 Value of assets exposed to settlement risk

a. Securities lending, securities borrowing, margin contracts, repurchase and reverse repurchase agreements

Value of assets exposed to settlement risk is the market value of the contract determined as follows:

- Exposures to settlement risk is as follows:

No.	*Type of transaction*	*Value of assets exposed to settlement risk*
1.	Term deposits, certificates of deposit, unsecured loans; contracts, transactions, capital use according to Point k, Clause 1, Article 10 of Circular 91.	Total balance of deposit account, certificate of deposit, loan value, contract value, transaction value plus dividends, bond interests, preference value (for securities) or deposits interests, loan interests, other surcharges (for credit).
2.	Securities lending	Max{(Market value of the contract –Collateral value (if any)),0}
3.	Securities borrowing	Max{(Collateral value – Market value of the contract),0}
4.	Reverse repurchase agreements	Max{(Contract value based on purchase price – Market value of the contract x (1 - Market risk coefficient)),0}
5.	Repurchase agreements	Max{(Market value of the contract x (1 – Market risk coefficient) - Contract value based on selling price),0}
6.	Margin contracts (loans to customers to purchase securities)/other economic agreements with the similar nature	Max{(Margin balance - Collateral value),0}

Margin balance includes outstanding loan principal, interest and other fees.

Customers' collateral value is determined in line with *Note 3.4.3*. In case the value of collaterals does not have any reference in the market, its value is determined by the internal methods of the Company.

Asset price is determined in line with *Note 3.3.2*.

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.4 Exposures to settlement risk (continued)

3.4.2 Value of assets exposed to settlement risk (continued)

b. Securities trading

Value of assets exposed to settlement risk in securities trading as the following standard:

No.	*Period*	*Value of assets exposed to settlement risk*
A – For the selling transactions (seller is the Company or its customers under the securities brokerage activities)		
1.	Before the settlement date/year	0
2.	After the settlement date/year	Market value of the contract (if Market value is less than Trading value)
		0 (if Market value is greater than Trading value)
B – For the buying transactions (buyer is the Company or the Company's customer)		
1.	Before the securities transfer date/year	0
2.	After the securities transfer date/year	Market value of the contract (if Market value is less than Trading value)
		0 (if Market value is greater than Trading value)

Settlement/transfer period of securities is T+2 (for listed securities), T+1 (for listed bonds); T+n (for transactions outside the official trading system within n days under agreement of both parties), or in accordance with prevailing regulations (for derivatives).

c. Receivables, matured bonds, matured debt instruments

Value of assets exposed to settlement risk is the value of receivables calculated based on par value, plus accrued interest, related costs and less cash received previously (if any).

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.4 Exposures to settlement risk (continued)

3.4.3 Deduction of collateral

The value of collaterals shall be deducted from the Company's value of assets exposed to settlement risk if the related contracts and transactions satisfy the following conditions:

- Partners or customers use collaterals to ensure their fulfilment of obligations and their collaterals are cash, cash equivalents, valuable papers, negotiable instruments on the money market, securities listed and registered on the Securities Stock Exchange, Government bonds, bonds guaranteed by the Ministry of Finance;
- The Company has rights to control, manage, use, and transfer collaterals if partners fail to make payment fully and timely as agreed in the contracts.

Value of asset subjected to deduction is determined as follows:

Collateral value = Volume of assets x Asset price x (1 – Market risk coefficient)

Assets price is determined in accordance with *Note 3.3.2*.

3.4.4 Increase in exposures to settlement risk

Exposures to settlement risk are adjusted to increase in the following cases:

- An increase of 10% if the value of deposits contracts, certificates of deposits, loans, undue receivables, repurchase agreements, reversed repurchase agreements, the total value of loans to an organization, an individual and a group of related organizations/ individuals (if any) account for more than 10% to 15% of the owners' equity of the Company;
- An increase of 20% if the value of deposits contracts, certificates of deposits, loans, undue receivables, repurchase agreements, reversed repurchase agreements, the total value of loans to an organization, an individual and a group of related organizations/ individuals (if any) account for more than 15% to 25% of the owners' equity of the Company;
- An increase of 30% if the value of deposits contracts, certificates of deposits, loans, undue receivables, repurchase agreements, reversed repurchase agreements, the total value of loans to an organization, an individual and a group of related organizations/ individuals (if any), or an individual and related parties of that individual (if any), account for more than 25% of the owners' equity of the Company.

3.4.5 Net bilateral clearing value of assets exposed to settlement risk

Value of assets exposed to settlement risk is subject to net bilateral clearing in cases:

- Settlement risk relating to the same partner;
- Settlement risk occurred to the same type of transaction;
- The net bilateral clearing is agreed in prior by related parties by documents.

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.5 Exposures to operational risk

Exposures to operational risk are the potential losses which may occur due to technical errors, system errors and business processes, human errors during performing their work, or due to the lack of capital resulting from expenses, losses arising from investment activities, or other objective reasons.

Exposures to operational risk of the Company is determined at the higher of 25% of the Company's operational maintaining expenses within twelve (12) consecutive months up to reporting date or 20% of the Company's legal capital.

The Company's operational maintaining expenses are determined from total expenses incurred in the period less: depreciation expense; reverse/provision expense for the impairment of short-term, long-term financial assets and mortgage assets; reverse/provision expense for the impairment of receivable; reverse/provision expense for the impairment of other short-term assets; and loss from revaluation of financial assets at fair value through profit or loss ("FVTPL"), interest expenses and loss from revaluation outstanding covered warrants payables which has been recognized into expense in the period.
